

## Could you come outside and play

Listen to my heart girl hear it singing in the wind  
Sitting here all alone makes me wonder where I've been  
Rainbow across the sky could it lead me to you  
Both of us searching for a love that's true  
There you are and here I am just a few words away  
Just like when we were young could you come outside and play  
Could you come outside and play my lady could you come outside with me  
Could you come outside and play and let your heart run free  
Could you come outside and play, you can choose the game  
Could you come outside and play in the sun and in the rain  
You can see it in my walk, you can see it in my smile  
Could you come outside and play girl, you know it's been awhile  
We need to let the feelings held deep here in our hearts  
See the light of day searching for our start  
There you are and here I am just a few words away  
Just like when we were young could you come outside and play  
Could you come outside and play my lady my heart sings out to you  
Could you come outside and play and start a love so true  
Could you come outside and play, you can choose the game  
Could you come outside and play and maybe change your name  
Remember when times were simple and gentlemen broke your fall  
Loving and laughter heart beating faster waiting for that call  
Two hearts can sound together when two people feel the same  
Just like when we were young in the sun and in the rain  
Could you come outside and play my lady could you come outside with me  
Could you come outside and play and let your heart run free  
Could you come outside and play, you can choose the game  
Could you come outside and play with me in the sun and in the rain
