

## Plain around The Edges

She's plain around the edges, with a heart of gold  
Strong through the hard times, no thought or hint of fold  
Her beauty hidden softly but it's right there to see  
I thank the stars nightly for the day that she picked me  
Plain around the edges, with a heart of gold  
I hold her hand in mine, with a love untold  
She's the rock on which we build, she's where I get my pride  
I look upon her daily with a love I cannot hide  
Hand in hand together, we've struggled on our way  
When times were bad or I was sad she'd get me through the day  
At night I lay beside her, loving arms would mend  
She's the love of my life, my wife and my best friend  
Across a crowded room, we talk with just our eyes  
She reads a small shy smile of a love I cannot hide  
She walks across the room, with a glow just meant for me  
This loving strong soft woman, she's where I need to be  
We leave the party early, hand in hand with pride  
Together in the night with a love we cannot hide  
Plain around the edges, with a heart of gold  
I hold her hand in mine, with a love untold  
She's the rock on which we build she's where I get my pride  
I look upon her daily with a love I cannot hide
